

JAMES CALDWELL

Full Stack Software Engineer | .NET | React | AI-enhanced development

Monticello, MN | jcaldwell.io

785.727.9319 | james.caldwell82@outlook.com

Full Stack Software Engineer with 4+ years of experience designing, building, and supporting enterprise web applications using .NET Core, React, TypeScript, Azure, SQL Server, and modern cloud technologies and 4+ years of experience training in .NET Core technologies using React UIs. Proven track record delivering scalable software solutions, improving application performance, implementing AI-driven development workflows, and partnering with cross-functional stakeholders to drive business outcomes. Experienced throughout the full software development lifecycle (SDLC), system modernization initiatives, cloud-based application development, DevOps practices, and engineering mentorship.

EXPERIENCE

SOFTWARE ENGINEER

Quest Analytics LLC | Overland Park, KS

JULY 2022- SEPTEMBER 2026

- Contributed to the design, development, and launch of an enterprise outreach platform using .NET Core, React, Azure, and SQL Server, helping modernize legacy systems, reduce operational overhead, and improve user experience for internal and external stakeholders.
- Improved performance and scalability of a React, TypeScript, .NET Core, and SQL Server application by optimizing database queries and implementing front-end lazy loading, reducing session load times from ~45 seconds to under 5 seconds.
- Collaborated with third-party vendors and internal stakeholders to integrate fax, email, phone, and AI-powered voice outreach solutions, supporting business process automation and improving practitioner data collection, verification, and outreach efficiency.
- Provided production support and platform observability through FullStory, Datadog, Seq, and Azure Portal, performing incident investigation, root cause analysis, and proactive monitoring to ensure application reliability, performance, and user satisfaction.
- Led implementation of AI-assisted software development workflows utilizing Claude Code, CodeRabbit, automated test generation, documentation validation, and knowledge management systems, increasing developer productivity, improving code quality, and accelerating SDLC delivery.
- Mentored multiple engineering interns through technical coaching, SDLC best practices, and real-world software delivery processes, accelerating professional development while strengthening understanding of engineering decision-making, stakeholder collaboration, and business alignment.
- Served on the Quest Ambassador Team, mentoring and supporting 5 new hires through onboarding, knowledge transfer, and cultural integration initiatives that improved employee engagement and accelerated organizational readiness.
- Gathered business requirements and collaborated with product owners and stakeholders to design, implement, and deliver software solutions that improved operational efficiency and user experience.
- Authored detailed user stories, technical specifications, and defect tickets within Azure DevOps, improving engineering workflow efficiency and development accuracy.
- Championed achieving increased code coverage (from ~50% to over 74.1%) of the .NET Core APIs, writing unit tests using XUnit, Moq, and other tooling to further regression-proof the applications.

CO-LEAD / TECHNICAL TRAINER

Centriq Training | Kansas City, MO

APRIL 2019- AUGUST 2022

- Delivered full-stack web development instruction covering C#, .NET Core, SQL Server, JavaScript, and React to students transitioning into software engineering careers.
- Developed and maintained curriculum aligned with modern .NET and React development practices.
- Mentored junior instructors and provided coaching on effective technical education methodologies.
- Consistently received strong student satisfaction scores and feedback.

FRONT END DEVELOPER - CONTRACTOR

Houlihans Restaurants Inc. | Lenexa, KS

SEPTEMBER 2018 – MARCH 2019

- Utilized .NET Nuke/Evoq to develop 6 websites to match initial design PDFs for Bristol Seafood Grill and Devon Seafood Grill restaurants that are still being utilized today.
- Worked with marketing closely to ensure that the websites were all SEO-optimized and ADA compliant.

EDUCATION

CERTIFICATE IN FULL STACK WEB DEVELOPMENT TRACK

Centriq Training | July 2018

- Completed a 4-month training program that taught the basics of web development, teaching C#, ASP.NET MVC design patterns, learning about SQL Server, JavaScript, jQuery, Bootstrap UI, and other key implementations.

BACHELOR'S OF SCIENCE, PSYCHOLOGY

Grace University, graduated with honors | 2008

TECHNICAL SKILLS

Languages & Frameworks: C#, TypeScript, JavaScript, .NET Core, ASP.NET Core, React, GraphQL, Hot Chocolate

Cloud & Data: Microsoft Azure, Azure Blob Storage, SQL Server, MongoDB, Snowflake

Testing & Quality: xUnit, Moq, Vitest, Unit Testing, Integration Testing, Test Automation DevOps & Engineering: Azure DevOps, CI/CD, Agile, Scrum, SDLC

Monitoring & Operations: Datadog, FullStory, Seq, Incident Response, Root Cause Analysis

AI-Assisted Development: Claude Code, CodeRabbit, Test Generation, Documentation Validation, Workflow Automation

Certifications: CompTIA CTT+ Certified Technical Trainer
